BROADCAST FLOORING SYSTEMS

Outdoor Supreme Full Chip System

- ① Prepared Concrete
- ② Moisture Vapor Barrier (MVB)
- ③ Polyurea
- ④ Acrylic Flake Broadcast
(Aggregate and Rubber Options)
- ⑤ Polyaspartic
- ⑥ Polyaspartic

System Description:

The Outdoor Supreme Full Chip System is a high-performance outdoor broadcast system which consists of a moisture vapor barrier followed by a layer of polyurea. Acrylic flakes are then fully broadcasted into the polyurea. The flakes are then sealed with two layers of polyaspartic. This system is formulated for use on patios, driveways, and walkways.

System Advantages:

- Quick turnaround/return to service
- Moisture vapor barrier installed as first layer
- Slip resistant
- High impact and abrasion resistance
- Easily repaired
- Hides dirt and debris
- Low odor
- Color and UV stable
- Utilizes Sherwin Williams industrial products
- 5 year warranty

System Installation Overview:

1. Saw cuts, divots, pits, and small defects in concrete to be patched and filled with flex paste.
2. Apply a layer of pigmented Moisture Vapor Barrier at 16 mils.
3. Apply a layer of pigmented Sherwin Williams Polyurea at 10 mils.
3. Broadcast flakes to full refusal into the Polyurea.
4. Apply a grout coat of Sherwin Williams Polyaspartic at 12 mils.
5. Apply a top coat of Sherwin Williams Polyaspartic at 6 mils.
