CHARACTERISTICS

SUPERIOR HYGIENE & INFECTION CONTROL - In healthcare facilities, maintaining sterile environments is paramount to prevent the spread of infections. Epoxy and urethane cement floors offer seamless and impervious surfaces that do not harbor bacteria, viruses, or fungi, significantly reducing contamination risks. Their ease of cleaning and resistance to harsh disinfectants make them ideal for areas requiring stringent hygiene standards, contributing to enhanced infection control and patient safety.

SAFETY - With safety being a top priority, our healthcare flooring solutions can be formulated to provide slip resistance. This additive enhances the safety of your patients and staff, especially in areas prone to spills or wet conditions.

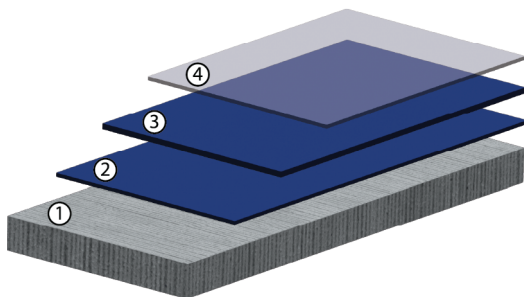

LOW MAINTENANCE - Once installed, our floors require minimal maintenance. Routine cleaning with mild detergents is typically all that is needed to keep them looking brand new!

ENHANCE DURABILITY & RESILIENCE - Healthcare facilities experience constant foot traffic, the movement of heavy equipment, and frequent spills. Epoxy and urethane cement flooring systems are engineered to withstand these challenges, offering high resistance to wear, impact, and chemical spills. This durability ensures that the flooring remains in excellent condition, supporting the facility's operational efficiency and longevity.

OUR SOLUTIONS

Thin Mil- CT-3EEU

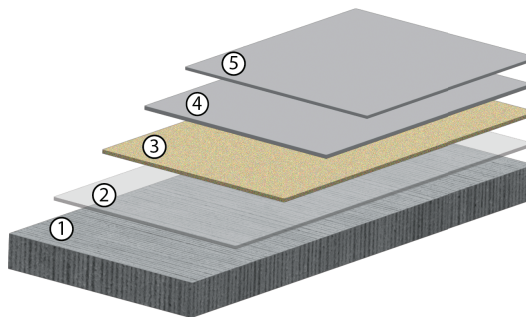

1. Prepared Concrete
2. 100% Solids Epoxy
3. 100% Solids Epoxy
4. High Performance Urethane

Impact Resistance

Broadcast- BC-4EAPU

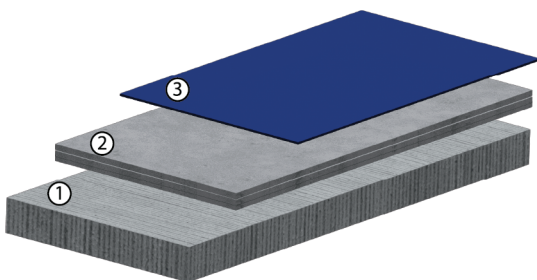

1. Prepared Concrete
2. 100% Solids Epoxy
3. Aggregate Sand (flake option)
4. 100% Solids Polyaspartic
5. High Performance Urethane

Impact Resistance

Slurry- SL-2UcU

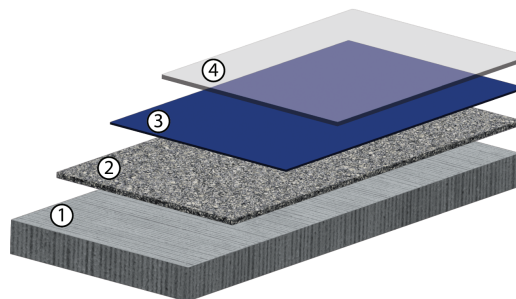

1. Prepared Concrete
2. Urethane Cement
3. High Performance Urethane

Impact Resistance

Mortar- MT-3MmEU

1. Prepared Concrete
2. Mortar Mixture
3. 100% Solids Epoxy
4. High Performance Urethane

Impact Resistance

Brilliant Epoxy Floors offers a wide variety of healthcare flooring systems. Our flooring experts will evaluate your facility to determine which system best matches your flooring needs.
